

**E-FLARE.**  
**Safety Warning Lights.**

**Light Source**

High-luminosity solid state LED's rated for greater than 100,000 hour operating life and 360 degree light beam (flashing and steady-on models available)

Visible at more than one mile (two kilometers) at night and an operating life of more than 50 hours for each set of batteries. **(Model dependant; use quality alkaline batteries)**

**Lens Design**

Primary beam directed horizontally. The light is eight inches (20 centimetres) above the ground, to ensure good visibility to approaching vehicles.

**Safety Features**

The beam is designed to be visible to approaching vehicles from any direction and the unit has a safety fluoro-yellow high-performance ABS body.

A positive action switch means light cannot be switched on or off by accident.

No strobe effects or night blindness.

**Beacon Construction**

Shock resistant

Water proof to 30m, dustproof, vibration proof

Can withstand drops on to hard surfaces from three feet (one metre) without damage

Detachable rubber base increases flexibility of beacon

**Usage Options**

Can be used in **HAZMAT** areas

Can be mounted in the top of a cone with the optional Cone Mount Clip.

Can be clipped to a sign, vehicle window or worn as a personal safety device

Can operate at extreme temperatures, hot and cold

**Available in the following configurations:**
