

SAFCO Visual Protection Sheet. (VPS)

The Visual Protection Sheet (**VPS**) has been designed in conjunction with Station Commander Ian Cox of Royal Berkshire Fire and Rescue Service who also heads up the services extrication teams.

The **VPS** is a square sheet which has a clear window in the centre. The sheet covers the casualty and the medical professional during extrication, allowing them both to keep constant visual contact with the extrication team leader throughout the complete rescue process.

The **VPS** is manufactured from spun bonded polypropylene which is lightweight and breathable so avoiding the "boil in the bag" feeling associated with a clear plastic sheet.

It is machine washable up to 5 times.

The **VPS** is available Blue or Black only and in two sizes; 2m x 2m and 3m x 3m. They are supplied in packs of 10.

2m x2m: £199.50

3m x3m: £249.50

Prices exclude Vat and carriage. (NB: Bespoke sizes are available on request)
